

# DAYTECH

## SmartPower©

The intelligent, IIoT SmartPower Battery gives remote wireless Control and Power, all-in-one!

- ✓ Battery Power and Wirelessly Control equipment remotely and intelligently with IIoT.
- ✓ Save 60%-80% or more on total project costs by going wireless and battery powered. Plug and Play.
- ✓ 75% lower cost of ownership of wired systems - no power bills!
- ✓ Clean & Environmentally friendly.
- ✓ Drag and drop, full Real-Time Remote monitoring and control with SmartNode IIoT Technology.
- ✓ Easy to use, edge intelligent analytics and automation.

# **DAYTECH**

## **SmartPower©**

**Distributed Power and Control  
IoT + Li-ion high capacity  
SmartNode Gateway Battery**

**The most innovative Battery  
and Automation System!**

- # Modular “Building Blocks”**
- # Massively Scalable design**
- # Rugged / Safe Battery**
- # High Temperature Rating**
- # Solar MPPT Charging in built**
- # Remote IoT Real-Time Control**
- # Fully integrated design**

# A battery that thinks for itself!

Daytech's "SmartPower" is not just another battery, it represents a significant step forward

- ▶ Power and Control Instruments, actuators and equipment, with various load ratings.
- ▶ Leveraging Daytech's suite of High-Tech IoT/AI Edge Intelligence Hardware and software IP.
- ▶ Remote Off-Grid Power + Automation... All-in-one. Distributed Equipment Power and Control Platform. 24VDC, 480Wh.
- ▶ Intelligent charging and discharging, multiple inverter integrations possible.
- ▶ Automatic fault diagnostics, individual module protection, advanced notifications.
- ▶ Daytech's IoT Platform allows extremely high level of integration.
